

Integrated EDI for Acumatica

INTEGRATED EDI FOR ACUMATICA

Managing high transaction volumes and adapting to new trading partner requirements are critical challenges in today's business environment. Companies often encounter issues like delayed transaction processing during peak periods, difficulties in quickly integrating new systems, and the complexities of maintaining a heavily customized tech stack. Additionally, staying current with ERP updates is essential to avoid operational disruptions.

TrueCommerce's EDI solution for Acumatica is designed to address these challenges head-on. It offers a scalable, adaptable solution that simplifies transaction management, supports rapid integration, and ensures smooth ERP upgrades. This comprehensive approach helps future-proof your operations and enhances your business's efficiency and agility.

Complete Solution From One Source

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI.

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

We've probably grown our business 20% since we started with TrueCommerce EDI. It's allowed us to scale our business without growing headcount."

Web-based EDI Translation Software, TrueCommerce Transaction Manager™, is our user-friendly translation software that converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form. TrueCommerce Transaction Manager can be deployed as on-premise software or as a web-based (SaaS) deployment hosted by TrueCommerce.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and Acumatica through the TrueCommerce Business System Plug-In™.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within Acumatica as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Pre-Built ERP Integration seamlessly connects your Acumatica system to an extensive network of trading partners. This integration automates critical document exchanges, such as buy/sell transactions and logistics through 3PL adaptors, all while preserving your existing ERP workflows. The intuitive interface is tailored to the Acumatica environment, ensuring smooth and efficient operations that enhance your overall business performance.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

Integrate Your Entire Supply Chain with Acumatica

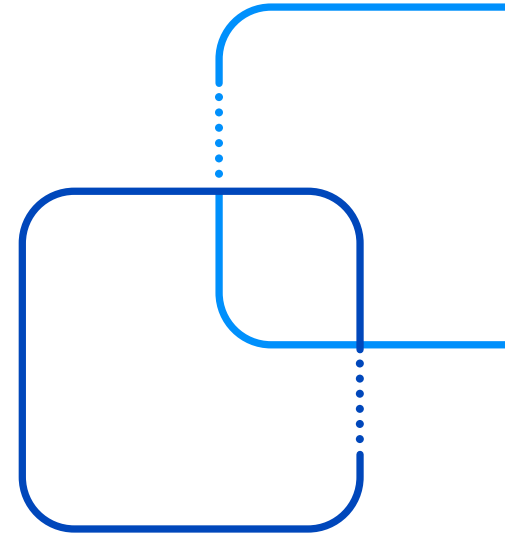

Choosing an end-to-end EDI solution that offers seamless integration with your Acumatica system is a strategic investment that can improve customer relationships, business agility and profitability. But that's just the beginning of what TrueCommerce integrations offer our customers!

Integrating your TrueCommerce EDI solution with Acumatica reduces the need to print or re-enter transactions, which makes order processing faster and more efficient without sacrificing accuracy. TrueCommerce Transaction Manager offers powerful sales order, remote warehouse and purchasing integration that's proven, affordable and easy to use – enabling you to meet all of your customers' EDI requirements.

TRUECOMMERCE TRANSACTION MANAGER FEATURES AND BENEFITS FOR ACUMATICA

Robust Acumatica Integration for Greater Efficiency and Customer Satisfaction:

- Integration includes sales order and invoice transactions, including inbound Purchase Orders (850/875), outbound Invoices (810/880), Advance Ship Notices (856), Purchase Order Acknowledgments (855), and Purchase Order Changes (860)
- Send outbound inventory availability (846) and product catalogs (832) to your customers
- Outbound ASN integration supports no pack, pick and pack, standard, pallet, and consolidated ASNs
- Built-in auto-pack capabilities give you the ability to package your shipments in Acumatica, streamlining the process of creating and packaging items
- Auto-pack shipments based on quantity or weight and create packaging rules for each customer
- Speeds up order processing and fulfillment while improving accuracy

Built-in Process Controls Ensure Data Integrity, Reduce Errors and Minimize Chargebacks

- With our embedded labeling feature, you can produce trading partner compliant GS1-128 labels within the ERP, streamlining the order fulfillment process
- Visibility into EDI documents sent to your partners is now available directly inside the ERP, providing simple usability and the ability to report on this data leveraging your ERP reporting capabilities. The solution validates fields prior to sending transactions and provides alerts to highlight any fields with missing data, helping to optimize turnaround time on orders and reduce chargebacks from customers.
- Unit pricing, along with duplicate purchase order numbers and items, can be automatically validated before processing transactions to Acumatica
- Secure connectivity leveraging token-based authentication
- Speeds up order processing and fulfillment while improving accuracy

Streamline Your Third-Party Warehouse Communications:

- Outbound warehouse shipping orders (940) can automatically be created from existing sales orders from within Acumatica
- Outbound warehouse transfer orders (943) let manufacturers send pending shipment details to their 3PL partners, and inbound warehouse receipts (944) enable 3PLs to confirm detail receipt
- Integrated warehouse shipping advices (945) will update existing shipments with package and item contents in addition to shipping information (e.g., tracking, ship weight, quantity); lot and serial numbers are supported, as well as consolidated shipments.
- Outbound advance ship notices (ASNs) can easily be sent to your customer based on the information from the 945
- Communicate with your logistics providers with deep warehouse integration. Support documents include sending outbound sales orders or item fulfillment and receiving warehouse shipping advices to create or update the item fulfillment. You can also exchange transfer orders and transfer advices

High-Value, Web-Based Add-Ons Streamline Order Processing Even More:

- You can schedule and automate data exchanges between Acumatica and your TrueCommerce EDI Solution with the TrueCommerce Scheduler add-on
- The TrueCommerce Packing List add-on simplifies the management of all trading partner requirements for packing list templates, including content, data, and graphics—and automatically updates them when your partners make changes at no additional charge
- Integration for outbound purchase orders and purchase order changes
- Inbound integrated documents support order acknowledgments, shipments, receipts, and bills

Automate Everyday Tasks

Import and export EDI transactions at scheduled times with the TrueCommerce Scheduler™ add-on. To meet partners' labeling and packing requirements with one solution, the TrueCommerce Labeling add-on automates the creation of UCC/GS1-128 compliant, barcoded labels, with label and packing list template updates included for free.

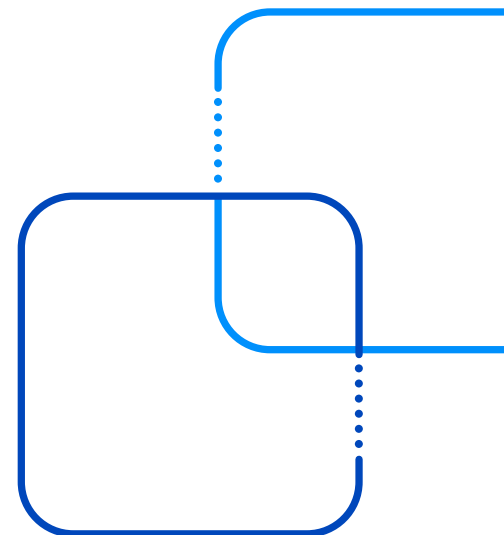

Supports Integration with 3G Pacejet

For those using 3G Pacejet as their shipping partner, we seamlessly integrate with their system to enhance your shipping processes. Our EDI solution ensures that your shipping operations remain efficient and well-coordinated, creating a seamless experience from order processing to final delivery.

Custom Fields Integration

TrueCommerce Transaction Manager supports integration for custom fields of your choice. While multiple data fields can be integrated, shipment and delivery dates illustrate essential data that is important when processing your documents.

Regardless of which field or data type you would like to incorporate as a custom field, Transaction Manager will automatically recognize and populate those fields, eliminating the need to manually re-key that data each time.

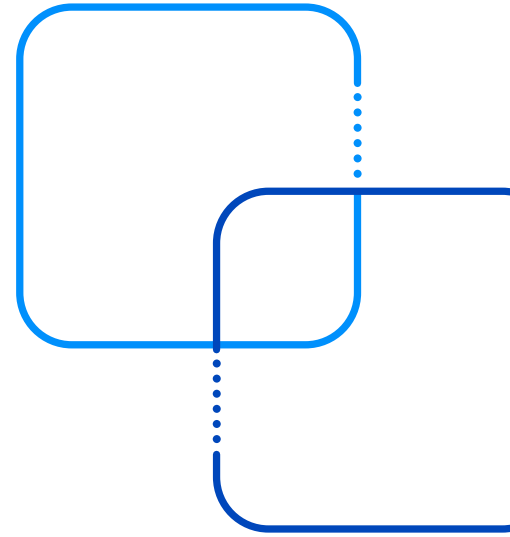

Connect to 100+ Marketplaces and Storefronts Worldwide

Integrate Acumatica seamlessly with more than 100 leading online marketplaces and storefronts, including Amazon, eBay, Walmart, Shopify, WooCommerce, and more. Automatically exchange order, fulfillment, customer, and inventory data across all platforms, eliminating the need for manual entry and ensuring accuracy. Whether you're managing sales through marketplaces like Amazon Seller Central and Vendor Central or popular web stores like Magento and BigCommerce, our solution streamlines your operations by synchronizing data in real-time. Enjoy faster order processing, automated customer creation, and consistent updates to pricing and inventory—enhancing visibility and efficiency across your entire eCommerce ecosystem.

Integrate with Retailers

APIs Integrate directly with your trading partners' API platforms. Our API integration lets you exchange data in real time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up to date with inventory feed automation and enjoy fully supported map updates for ongoing compliance.

In the first year, we saved 10-12 hours per week, which gave our employees time to work on real customer issues. It adds up—that's more than 500 hours per year saved."
